ARTWORK REQUIREMENTS

Artwork should be sent via e-mail as vector files with all text converted to outlines or curves. Document color mode should be CMYK, and please indicate Pantone® PMS® color-match numbers.

The dye sublimation production process will entail a 'dot gain', so we may need to 'open up' those areas that are likely to fill in. This is especially common when printing copyright or trademark symbols. For best results, art should be sent as large as possible.

For non-vector files, additional artwork charges may apply. When sending non-vector files, a resolution of at least 300 dpi is suggested.

Preferred File Formats

- .AI Adobe Illustrator
- .PDF Portable Document Format – Adobe PDF

Other file formats (.JPEG, .GIF, .PSD) may be usable, but likely will incur additional artwork charges.

Please submit files to: art@trans-texinc.com and include PO number.
